**POL-EKO-APARATURA**

Your partner in laboratory analysis and technological processes

## POL-EKO-APARATURA sp.j.

---

POL-EKO-APARATURA has been present in the scientific market since 1990. In addition to manufacturing and trading activities, the company provides professional advice on selection, operation and maintenance of measuring, analysis and control equipment. We organise seminars on laboratory analysis, waste management and disposal, laboratory management systems and validation of analytical methods.

Since 2006 we have exported our equipment worldwide. Nowadays, our export sale comes up to 40% of all manufactured products that have been delivered to many countries of Europe, Asia, Africa, North and South America, and Australia. Independently of developing the manufacturing activity, we have been an authorized distributor in Poland of measuring and control equipment provided by the following companies: ARCTIKO, AQUALYTIC, EUTECH, HAMILTON, ISTRAN, KNICK, NICKEL-ELECTRO, RODWELL, THERMO SCIENTIFIC, WTW.

In 2005 we moved our headquarters to Wodzisław Śląski. New, modern office buildings and production halls of a total area of 4 000 m<sup>2</sup> provide safe and friendly work environment.

To deliver complex services and quality products to our customers, we implemented an Integrated Management System in compliance to the PN-EN ISO 9001 norm in 2004. We also established a Measurement Laboratory that provides calibration of laboratory equipment and has been accredited since 2008 by the Polish Centre for Accreditation (PCA) a member of ILAC.

# POL-EKO-APARATURA

January 1990

**POL-EKO-APARATURA founded**

1996

**Start of production**

1997

New product launched:  
waste water receipt station

2001

New product launched:  
stationary sampler

1990

**Starting cooperation with WTW Germany; POL-EKO-APARATURA as general distributor in Poland**

1996

New products launched:  
thermostatic cabinet and laboratory refrigerator

2000

New product launched:  
colony counter

2002

**Starting cooperation with foreign laboratory and measuring equipment producers, such as AQUALYTIC, EUTECH**

**Knick**

2005

New products launched:  
stainless steel drying oven, incubator and cooled incubator

November 2005

**Moving the company to new headquarters in Wodzisław Śląski**

2006

**Development of export sale**

2007

New product launched:  
laboratory sterilizer

March 2005

**Eurolab Trade Fairs Award - CyberScan 6500**

2006

New products launched:  
instruments in TOP version with Ethernet connection

2006

**Measurement Laboratory founded**

2007

New products launched:  
climatic chambers and climatic chambers with phytotron system

May 2009

**POL-EKO-APARATURA chosen the 2008 "Local Leader of Enterprise"**

June 2009

**Starting building another production hall**

March 2010

**Eurolab Trade Fairs Award - Cooled incubator ILW 115 TOP+**

2010

New products launched:  
laboratory furniture and fume hoods

May 2009

**POL-EKO-APARATURA exhibits at ACHEMA in Frankfurt am Main**

March 2010

**Eurolab Trade Fairs Award - Monitoring station PP 2002M**

2010

New product launched:  
Pass-through drying oven

April 2011

**POL-EKO Laboratorium pomiarowe company founded**

# development history

2002 New products launched:  
pH and dissolved  
oxygen on-line meters

2003 Eurolab Trade Fairs  
Award - CyberScan 5500

March 2004 Eurolab Trade Fairs  
Award - BOD OxiDirect

2004 New products launched:  
stainless steel drying oven,  
incubator and cooled incubator

2003 New product launched:  
homogenizer

March 2003 Eurolab Trade Fairs  
Award - EcaFlow 150 GLP

March 2004 Eurolab Trade Fairs  
Award - stationary  
sampler PP 2002

December 2004 **Implementing ISO 9001  
and 18001 systems**

April 2008 **Measurement Laboratory  
receives accreditation  
from the Polish Centre  
for Accreditation**

AP 116

May 2008 **POL-EKO-APARATURA  
exhibits at IFAT expo  
in Munich**

January 2009 **New production  
hall opened**

March 2009 Eurolab Trade Fairs  
Award - Orion STAR PLUS

May 2008 City Mayor of Wodzisław  
Śląski awards  
POL-EKO-APARATURA  
for involvement  
in cooperation  
between Polish  
and Czech  
enterprises  
and municipalities

2009 New product launched:  
laboratory shaker

January 2009 **POL-EKO-APARATURA  
co-exhibits at ARABLAB  
Fairs in Dubai**

March 2009 POL-EKO-APARATURA  
receives an award from  
Local Chamber of  
Commerce: "Friendly  
to the Environment"

2011 **POL-EKO-APARATURA  
co-exhibits at PITCON  
in the USA and ANALITIKA in Moscow**

March 2012 **Graphite revolution  
New design of  
POL-EKO-APARATURA  
equipment**

## Contact Us

**POL-EKO-APARATURA:** tel. +48 32 453 91 70

**e-mail:** export@pol-eko.com.pl

**Export Managers:** tel. +48 32 453 91 88; +48 32 453 91 93

**Head of Marketing Department:** tel. +48 32 453 91 75

**Shipping and invoicing:** tel. +48 32 453 91 90

## Fairs and exhibitions

Some of the lab exhibitions we have participated in: **EuroLab** - Poland, **IFAT** - Germany, **Achema** - Germany, **ArabLab** - United Arab Emirates, **WodKan** - Poland, **POLEKO** - Poland, **Medicina and Technology** - Croatia, **LabComplEX** - Ukraine, **Rich-Mac** - Italy, **Pittcon** - United States of America, **Analitica Latin America** - Brazil, **Lab Asia** - Malaysia, **A-TESTex/Analitika** - Russia.

**EuroLAB 2011**

**IFAT 2010**

**ArabLAB 2011**

**ACHEMA 2009**

Parameters description	53
Options and accessories	57
Temperature protection	67

## Application

- BOD determination
- microbiological research
- plant growing and microorganisms breeding at specified temperature
- storage of liquids and samples for physicochemical analysis

Thermostatic cabinets are equipped with both heating and cooling systems and can provide a stable temperature in a range of +3...+70 °C regardless of ambient conditions.

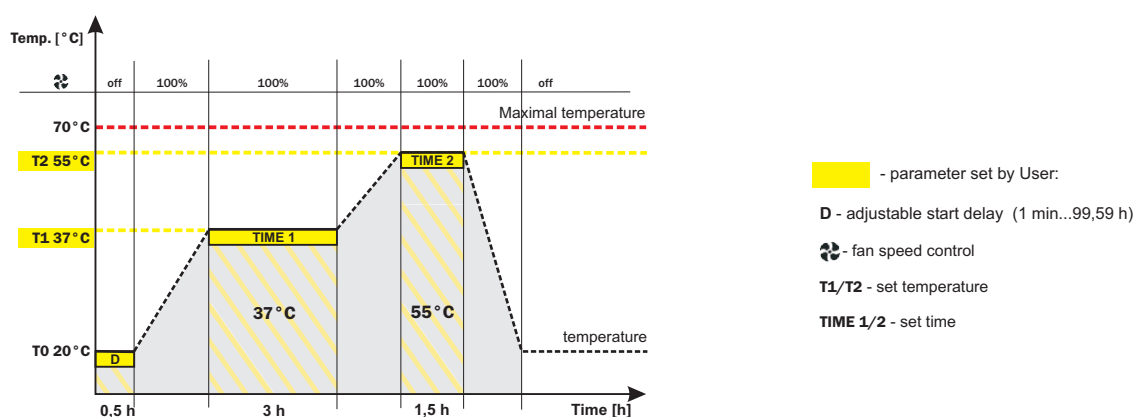

## Advantages

- available in two versions - basic and TOP+
- single or double chamber versions
- capacity from 68 to 1460 liters
- aluminum or stainless steel interior (depending on model)
- housing: powder coated sheet, stainless steel linen finish (**INOX/G**) or polished (**INOX/S**) (depending on model)
- thermal insulation - polyurethane foam
- solid, glass (**ST\*/A option**) or double (**ST\*/C option**) door type
- forced air convection
- heating and cooling systems to hold set temperature regardless of ambient conditions
- defrosting function (see page 56)
- wheels in ST 1200 and 1450 model
- four temperature ranges available
  - +3...+40 °C
  - +3...+50 °C (**ST/50 option**)
  - +3...+60 °C (**ST/60 option**)
  - +3...+70 °C (**ST/70 option**) **New!**
- LCD graphic display **New!**
- illuminated touch buttons **New!**
- microprocessor temperature control
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self-check function (auto control)
- automatic fan shut down after completing the program

## Program possibilities in basic version

- six segment temperature-time profile
- cycle run of the program
- 3 user programs memory
- adjustable start delay feature (from 1 min to 99:59 h)
- adjustable time of holding the set temperature from 1 min to 31 days, or continuous operating
- recording min, average and max temperature value separately for each segment
- overview of set parameters during operating time
- over temperature sound alarm
- temperature program priority (see page 56)

Program possibilities in TOP+ version, see page 28.

All POL-EKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website [www.pol-eko.eu](http://www.pol-eko.eu)

Thermostatic cabinets in TOP+ version

The ST thermostatic cabinets are available in the TOP+ professional version too. The TOP+ version features a full colour 5,7" touch screen with internal memory to store all measurement data. These are the only thermostatic cabinets which can be controlled from a PC, as they can be connected to an Ethernet network that enables the user to program the equipment virtually from any place in the world.

Details on page 28.

## Standard equipment

- solid door
- temperature range +3...+40 °C (+3...+60 °C in TOP+ version)
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- wire shelves (with slides set) in case of aluminum interior and stainless steel wire shelves in case of stainless steel interior
- manufacturer's test certificate at +37 °C
- operation manual in English and English menu (other languages on request)
- over temperature protection 1.0 class according to DIN 12880
- TOP+ standard equipment see page 28

## Options and accessories (icon description see page 51)

	● for basic version only			● for basic version and TOP+					● for TOP+ only					

ST 2+ INOX INOX/S with ST 2+/C option

## Available options :

- ST/50** - extended temperature range to +50 °C
- ST/60** - extended temperature range to +60 °C
- ST/70** - extended temperature range to +70 °C
- ST\*/C** - internal glass door
- ST\*/A** - external glass door
- PLUS** - automatic defrosting during operating
- FOT** - photoperiodic system

\* - at even surface workload

\*\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - additional internal glass door

3 - dims of units with double door can be smaller

4 - fluctuation measured in centre of the chamber

5 - two columns with 3 shelves each

6 - "fitted" number of shelves fitted, included in price

"max" number of shelves which can be fitted

### Available options

- ST/50** - extended temperature range up to +50 °C
- ST/60** - extended temperature range up to +60 °C
- ST/70** - extended temperature range up to +70 °C
- ST\*/C** - internal glass door
- ST\*/A** - external glass door
- PLUS** - automatic defrosting during operating
- FOT** - photoperiodic system

### Example of configuration

To configure a double-chamber thermostatic cabinet, e.g.:

- upper chamber equipped with solid door and temperature up to +60 °C
- lower chamber equipped with double door and temperature up to +40 °C, you select:

for ST 1/1+: ST 1/1+ and ST/60 option for upper chamber + ST 1/C option for lower chamber

### ST 2/2+ with additional options

Parameter		Model	ST 1/1+	ST 1/1/1+	ST 2/2+	ST 2/3+	ST 2/4+	ST 3/3+	ST 350/350

shelves fitted / max <sup>5</sup>			2/2	2/2	3/4	3/4	3/4	3/4	2/6
warranty			24 months						
manufacturer			POL-EKO-APARATURA						

\* - at even surface workload

\*\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - additional internal glass door

3 - dims of units with double door can be smaller

4 - fluctuation measured in centre of the chamber

5 - two columns with 3 shelves each

6 - "fitted" number of shelves fitted, included in price

"max" number of shelves which can be fitted

## Application

- storage of water and sewage samples, piezometer leachate
- storage of ASA, GC or HPLC calibration standards
- storage of reagents
- chemical storage
- general storage

Laboratory refrigerators are equipped with a cooling system and can provide a stable temperature lower than ambient.

## Advantages

- single or double chamber versions
- capacity from 68 to 1460 liters
- aluminum or stainless steel interior (depending on model)
- housing: powder coated sheet, stainless steel linen finish (**INOX/G**) or polished (**INOX/S**) (depending on model)
- thermal insulation - polyurethane foam
- solid, glass (**CHL\*/A option**) or double (**CHL\*/C option**) door type
- forced air convection
- heating and cooling systems to hold set temperature
- regardless of ambient conditions
- defrosting function (see page 56)
- wheels in CHL 1200 and 1450 model
- two temperature ranges available
  - 0...+10 °C
  - -10...+10 °C (**CHL\*/T option**) for CHL 500-1450
- LCD graphic display
- illuminated touch buttons
- microprocessor temperature control
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self-check function (auto control)

## Program possibilities

- single segment temperature-time profile
- temperature program priority
- adjustable start delay feature (from 1 min to 99:59 h)
- adjustable time of holding the set temperature from 1 min to 31 days, or continuous operating
- recording min, average and max temperature value separately for each segment
- overview of set parameters during operating time
- over temperature sound alarm

All POL-EKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website [www.pol-eko.eu](http://www.pol-eko.eu)

### Laboratory refrigerators CHL

All refrigerators, thermostatic cabinets and cooled incubators can optionally be equipped with an automatic defrosting function (PLUS option). It features a continuous operating without a necessity to defrost, keeping a stable temperature in the chamber. Details on page 65.

## Standard equipment

- solid door
- temperature range 0...+10 °C
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- wire shelves (with slides set) in case of aluminum interior and stainless steel wire shelves in case of stainless steel interior
- manufacturer's test certificate at +4 °C
- operation manual in English and English menu (other languages on request)
- over temperature protection 1.0 class according to DIN 12880

## Options and accessories (icon description see page 51)

**TB 35 INOX**

### Available options

**CHL\*/T** - extended temperature range to -10 °C

**CHL\*/A** - external glass door

**PLUS** - automatic defrosting function during operating

*A mini refrigerator TB 35 INOX with an additional battery power supply guarantees continuous operating in case of power failure. Details on page 19.*

4 - fluctuation measured in centre of the chamber

5 - two columns with 3 shelves each

6 - "fitted" number of shelves fitted, included in price

"max" number of shelves which can be fitted

Available options for each chamber :

- CHL\*/T** - extended temperature range to -10 °C
- CHL\*/A** - external glass door
- PLUS** - automatic defrosting during operating

Example of configuration

To configure a double chamber laboratory refrigerator, e.g.:

- upper chamber with solid door and temperature range 0...+10 °C
- lower chamber with solid door and temperature range -10...+10 °C, you select:

for CHL 350/350 model: CHL 350/350 and CHL 350/T option for lower chamber

There is a possibility to combine different sizes of ST+ and CHL+ chambers between models ST/CHL+ 2-5. (e.g ST 2+/CHL 3+)

CHL 2 / ZLN 85+

Parameter		Model	CHL 1/1+	CHL 1/1/1+	CHL 2/2+	CHL 2/3+	CHL 2/4+	CHL 3/3+	CHL 350/350
									
air convection			forced						
chamber capacity <sup>1</sup>	[l]		68/68	68/68/68	150/150	150/200	150/250	200/200	294/294
	[cu ft]		2,4/2,4	2,4/2,4/2,4	5,2/5,2	5,2/7,0	5,2/8,5	7,0/7,0	10,3/10,3
door type			solid / glass or double <sup>2</sup> (option)						
temperature range	[°C]		0...+10 / -10...+10 (option only for CHL 350/350)						
	[°F]		+32...+50 / +14...+50 (option only for CHL 350/350)						
controller			microprocessor with external LCD graphic display						
interior			aluminum / stainless steel						
housing			powder coated sheet / stainless steel linen finish INOX/G or polished INOX/S						
overall dims [mm]**	width		550	550	600	600	600	600	720
	height		1170	1740	1670	1870	2070	2070	2025
	depth		650	650	600	600	600	600	860
internal dims <sup>3</sup> [mm]	width		470	470	520	520	520	520	600
	height		430	430	660	660/860	660/1060	860	700
	depth		300	300	420	420	420	420	700
max shelf workload [kg]*	-		10	10	10	10	10	10	30
	PW version		on request						
max unit workload [kg]	-		20/20	20/20/20	30/30	30/40	30/50	40/40	75/75

over temperature protection			class 1.0 according to DIN 12880 / class 3.2 (option)						
voltage 50/60 Hz [V]			110-120/220-240						
shelves fitted / max <sup>5</sup>			2/2	2/2	3/4	3/4	3/4	3/4	2/6
warranty			24 months						
manufacturer			POLEKO-APARATURA						

\* - at even surface workload

\*\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - additional internal glass door

3 - dims of units with double door can be smaller

4 - fluctuation measured in centre of the chamber

5 - "fitted" number of shelves fitted, included in price

"max" number of shelves which can be fitted

## Advantages

- chamber capacity from 25 to 106 litres
- transport in stable temperature, e.g. +4 °C
- adjustable temperature from
  - -18 to +10 °C
  - -10 to +10 °C for TB 35 INOX
- stable temperature regardless of ambient conditions
- temperature display
- battery, car socket (not for TB 80A and TB 105A) or standard mains power supply, wireless temperature data loggers available (option)

## Application

- transport of:
  - water and sewage samples
  - biological substances, tissues etc.
  - blood and haematoid material according to certain directives

Thermostatic boxes, unlike normal car freezers, guarantee a stable temperature during transport. TB 35 INOX is a solution not only for customers who carry samples. With an additional battery power supply, it features also the functions of a mini refrigerator which is able to hold set temperature in case of power failure.

chamber with bottles for samples

wide range of wireless temperature data loggers is available

## Options and accessories

(only for TB 35 INOX)

Model		TB 32 A	TB 50 A	TB 80 A	TB 105 A	TB 35 INOX
Parameter						
chamber capacity	[l]	25	49	80	106	35
	[cu ft]	0,8	1,7	2,8	3,7	1,2
temperature range	[°C]	-18...+10				-10...+10
	[°F]	0...+50				+14...+50
interior	powder coated aluminium					stainless steel
housing	plastic					powder coated sheet

	height	265	410	365	465	310
	depth	300	265	400	400	340
nominal power [W]	60	45	65	65	90	
weight [kg]	20	25	45	50	40	
temperature resolution [°C]	every 1,0					
temperature fluctuation [°C]	± 1,0					
voltage [V]	230 AC 50/60 Hz or 12 DC					
warranty	12 months					
manufacturer	POL-EKO-APARATURA					

## Application

- long-term storage of samples and biological material for research
- storage of easily decomposing material (e.g. solid state)
- freeze resistance tests (e.g. of building materials: concrete, wood etc.)
- pre-freezing

Laboratory freezers can freeze and store frozen samples.

## Advantages

- single chamber models, possibility to combine ZLN 85+ with models: CHL 2+ to CHL 5+ and ST 2+ to ST 5+
- capacity from 85 to 299l
- plastic or stainless steel interior (depending on model)
- housing: powder coated sheet, stainless steel linen finish (**INOX/G**) or polished (**INOX/S**) (depending on model)
- two temperature ranges depending on model:
  - -25...0 °C
  - -35...0 °C
- thermal insulation - polyurethane foam
- cooling system
- natural air convection
- LCD graphic display **New!**
- illuminated touch buttons **New!**
- microprocessor temperature control
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self-check function (auto control)

## Program possibilities

- single segment temperature-time profile
- temperature program priority (see page 56)
- adjustable start delay feature (from 1 min to 99:59 h)
- adjustable time of holding the set temperature (from 1 min to 99:59 h), or continuous operating
- overview of set parameters during operating time
- over temperature sound alarm

All POL-EKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website [www.pol-eko.eu](http://www.pol-eko.eu)

### ZLN 85 + freezer

ZLN 85+ laboratory freezer can be combined with laboratory refrigerators CHL 2+, 3+, 4+, 5+ or thermostatic cabinets ST 2+, 3+, 4+, 5+ and delivered as a double chamber model.

## Standard equipment

- solid door
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- glass shelves in models ZLN 75, 145, 180; wire shelves (with slides set) in model ZLN 85+ and perforated shelves in models ZLN 125, 200, 300
- manufacturer's test certificate at -10 °C
- operation manual in English and English menu (other languages on request)
- access port for external sensor in models ZLN 85+, 125, 200, 300

## Options and accessories (icon description see page 51)

**ZLN 85+**

### Available options

**\*/W** - reinforced version

**\*/PW** - reinforced shelf

**QLK/\*** - wheels

**ECO, STD**  
**New!**

**TOP+**

displays

fan

stainless steel interior

automatic air-flap control (at the rear)  
**New!**

**CLW 53 STD**

## Equipment available in ECO version

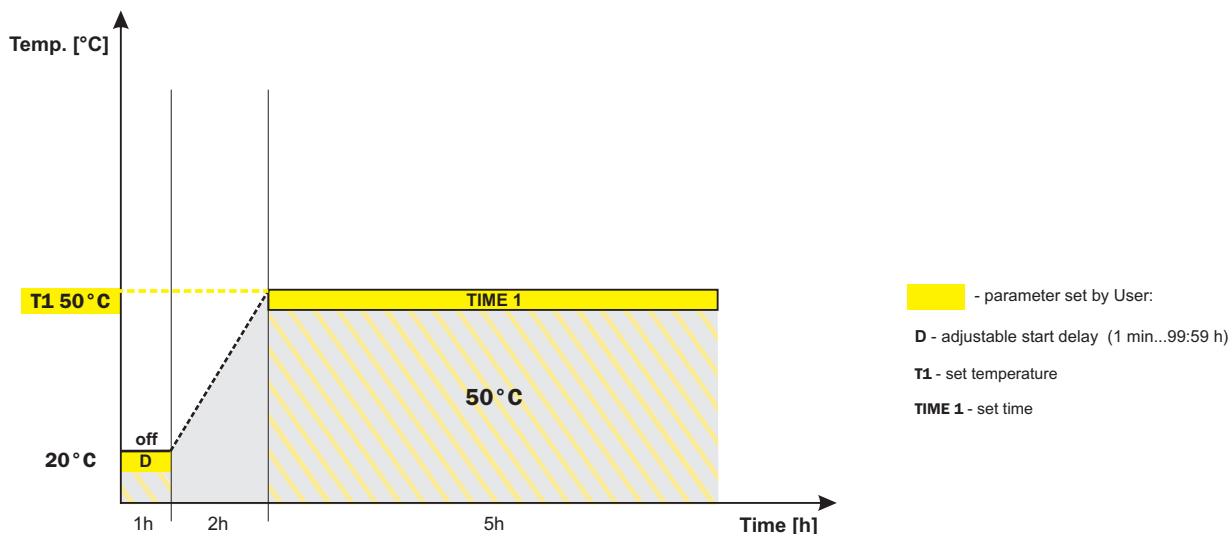

- Incubators (CL)
- Drying ovens (SL)

## ECO - basic version

- combination of basic parameters and indispensable accessories
- designed for simple applications
- very attractive price

## Program possibilities

- single segment temperature-time profile
- temperature program priority
- adjustable start delay feature (from 1 min to 99:59 h)
- adjustable time of holding set temperature (from 1 min to 99:59 h), or continuous operating
- 1 user program memory
- overview of parameters during operating time
- automatic air-flap control (adjustable) **New!**

## Standard equipment

- stainless steel interior
- housing: powder coated sheet or stainless steel linen finish (**INOX/G**) (depending on model)
- forced or natural air convection (depending on model)
- automatic fan shut down after completing the program (for instruments with forced air convection)
- solid door
- LCD graphic display **New!**
- illuminated touch buttons **New!**
- microprocessor temperature control
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- RS 232 interface and USB port **New!** (see page 56)
- self-check function (auto control)
- manufacturer's test certificate
- operation manual in English and English menu (other languages on request)
- stainless steel wire shelves (1-6 pieces, depending on model) with slides set
- over temperature protection according to DIN 12880: 1.0 class

## Equipment available in STD version

- Incubators (CL 53-1000)
- Cooled incubators (IL)
- Drying ovens (SL 53-1000)
- Sterilizers (SR)
- Climatic chambers (KK)

## STD-standard version

- extended programming possibilities
- wide range of optional equipment
- affordable price

## Program possibilities

- six segment temperature-time profile
- program priority: temperature for CL/IL/SL/SR and time for KK
- 3 user programs memory
- cycle run of the program
- adjustable heating up/cooling down system
- adjustable start delay feature (from 1 min to 99:59 h)
- adjustable hold at set point (from 1 min to 999 h), or continuous operating (temperature; humidity in KK; light with FOT and FIT options)
- overview of parameters during operating time
- recording min, average and max temperature (and humidity in KK) value for each segment
- over temperature (and humidity in KK) sound alarm (see page 58)
- fan speed control (for instruments with forced air convection)
- automatic air-flap control (adjustable) **New!**

## Standard equipment

- stainless steel interior
- housing: powder coated sheet, stainless steel linen finish (INOX/G) or polished (INOX/S) (depending on model)
- solid door
- forced or natural air convection (depending on model)
- automatic fan shut down after completing the program (for instruments with forced air convection)
- LCD graphic display **New!**
- illuminated touch buttons **New!**
- microprocessor temperature (and humidity in KK; light with FIT option) control
- temperature (and humidity in KK) sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- RS 232 interface and USB port **New!**
- self-check function (auto control)
- automatic defrosting in KK range
- manufacturer's test certificate
- operation manual in English and English menu (other languages on request)
- stainless steel wire shelves (1-6 pieces, depending on model) with slides set
- over temperature protection according to DIN 12880: 2.0 class in CL/IL/SL/SR; 3.3 class in KK

## Equipment available in TOP+ version

- Incubators (CL 53-1000)
- Cooled incubators (IL)
- Drying ovens (SL 53-1000)
- Climatic chambers (KK)
- Thermostatic cabinets (ST)

## TOP+ - professional version

### World's first full colour touch screen thermostatic equipment with Ethernet network connection!

To meet the expectations of the most demanding customers, POL-EKO-APARATURA has introduced a new professional range of ovens, incubators, cooled incubators and climatic chambers called "TOP+". First in the market to feature Ethernet network connection which allows to connect several units and program, monitor or record their parameters on any computer inside a laboratory or remotely via internet. Equipped with a full colour, clear 5.7" LCD touch screen, easy-to-use intuitive software, USB slot for data transfer make the operating comfortable. The large size of the display enables the user to view the unit's current parameters and program stage with only one touch of the screen. Additionally, the controller has been equipped with a 7-day programming mode and temperature (and humidity for the KK range) calibration feature at 3 points straight from the control panel.

## Standard equipment

- stainless steel interior
- housing: powder coated sheet, stainless steel linen finish (**INOX/G**) or polished (**INOX/S**) (depending on model)
- solid door
- forced or natural air convection (depending on model)
- automatic fan shut down after completing the program (for instruments with forced air convection)
- automatic air-flap control, adjustable
- full colour, transparent 5.7" LCD touch screen
- microprocessor temperature (and humidity in KK; light with FIT option)
- temperature (and humidity in KK) sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- USB slot
- RS 232 interface (see page 56)
- self-check function (auto control)
- automatic defrosting in KK range
- manufacturer's test certificate
- operation manual in English and English menu (other languages on request)
- stainless steel wire shelves (2-6 pieces, depending on model) with slides set
- over temperature protection according to DIN 12880: 3.1 class in CL/SL; 3.3 class in IL/KK/ST
- Ethernet connection
- TOP+ Control software, temperature (and humidity in KK, light with FIT option) control and monitoring via PC
- open door sensor
- fan speed control (for instruments with forced air convection)

Advanced program possibilities of the “TOP+” range:

- administrator function that allows to manage user accounts
- access control via login
- nine segment temperature-time profile or 7 days programming
- temperature (and humidity in KK) calibration in 3 points
- automatic air-flap control (each 10% regulation)
- cycle run of the program
- adjustable heating up / cooling down system
- adjustable start delay feature (from 1 min to 99:59 h)
- adjustable hold at set point (from 1 min to 999 h), or continuous operating (temperature; humidity in KK; light with FOT and FIT options)
- overview of parameters during operating time
- recording min, average and max temperature (and humidity in KK) value for each segment
- over temperature (and humidity in KK) sound alarm (see page 58)
- fan speed control (for instruments with forced air convection)
- time or temperature priority program

**GLP supporting functions:**

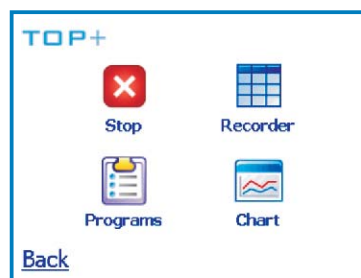

- password protected settings
- 20 user programs memory
- measurement memory with possibility of displaying the values in tabular or graphic form
- measurement data saving on external memory through the USB port

5.7" LCD full colour touch screen panel

Measurement recording

## TOP+ Control

To facilitate the configuration of complex programs, a TOP+ Control software has been introduced. Moreover, the user is able to program and control the “TOP+” equipment with ease from any corner of the world by accessing the unit via Internet!

Temperature chart

## EasyLab-T PLUS

**EasyLab-T PLUS** software features temperature and humidity monitoring in all thermostatic equipment manufactured by POL-EKO-APARATURA.

The user may record constant or temporary values, accumulate them and convert into charts. RS 232 or USB port allows the recording process (it is necessary to purchase a connection cable along with the software). If the unit is equipped with an additional Pt 100 temperature sensor, the EasyLab-T PLUS software enables simultaneous recording. Additionally EasyLab-T PLUS software enables programming of devices in TOP+ version, thanks to integrated TOP+ Control application.

**EasyLab-T PLUS** features high quality tools for chart making and approximation.

Standard features of EasyLab-T PLUS software:

- report creator
- data import from external memories
- multilanguage (Polish, Eenglish, German, Spanish, Hungarian, Portuguese, Romanian)

## Application

- incubation of samples for microbiological examinations
- analysis of thermal resistance of samples subjected to higher temperatures (e.g. pigments and lacquers)
- antibody testing
- bacterial research
- chemical storage
- crystallization studies
- cultivating thermophilic bacteria
- denaturalizing tests for food industry
- microbiological determinations
- pharmaceutical stability testing

Laboratory incubators can store samples in a higher temperature of up to 100°C.

## Advantages

- available in ECO, STD and TOP+ versions
- capacity from 15 to 1005 litres
- stainless steel interior
- housing: powder coated sheet or stainless steel linen finish (**INOX/G**) (depending on model)
- forced or natural air convection (depending on model)
- fan speed regulation from 0 to 100% for CLW 15, 32, 53, 115 and 240; from 10 to 100% for CLW 400, 750 and 1000
- heating system (temperature in the chamber cannot be lower than ambient temperature)
- CL 750 and 1000 models equipped with wheels
- LCD graphic display in ECO and STD version **New!**  
LCD touch screen in TOP+ version
- illuminated touch buttons in ECO and STD version **New!**
- microprocessor temperature control
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self-check function (auto control)

## Program possibilities

- ECO version (see page 25)
- STD version (see page 26)
- TOP+ version (see page 27-28)

## Standard equipment

- solid door
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- stainless steel wire shelves (1-6 pieces, depending on the model) with slides set
- manufacturer's test certificate at +37°C
- air-flap diameter 37 mm for CL 15, 32, 53 and 115; 60 mm for CL 240, 400, 750 and 1000
- operation manual in English and English menu (other languages on request)
- over temperature protection according to DIN 12880: 1.0 class in ECO version, 2.0 class in STD version, 3.1 class in TOP+ version

## Options and accessories (icon description see page 51)

● for ECO, STD and TOP+    ● for STD only    ● for STD and TOP+

All POLEKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website: [www.pol-eko.eu](http://www.pol-eko.eu)

### Available options

- CL\*/A** - door with viewing window
- CL\*/C** - internal glass door
- CL\*/W** - reinforced version
- PW** - reinforced shelf

Parameter		Model	CL 15	CL 32	CL 53	CL 115	CL 240	CL 400	CL 750	CL 1000

shelves fitted / max <sup>4</sup>			1/2	1/3	2/5	2/7	3/10	3/14	5/16	6/22
warranty			24 months							
manufacturer			POL-EKO-APARATURA							

\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - fluctuation measured in centre of the chamber

3 - additional internal glass door

4 - "fitted" - number of shelves fitted, included in price, "max" - number of shelves which can be fitted

## Application

- microbiological research
- plant growing, microorganisms and insects breeding at specified temperature
- samples incubation

*Cooled incubators can store samples in a stable environment regardless of ambient conditions, as the temperature range is -10...+100 °C.*

**ILW 115 STD INOX/G**

## Advantages

- available in STD and TOP+ versions
- chamber capacity from 56 to 749 litres
- stainless steel interior
- housing: powder coated sheet or stainless steel linen finish (**INOX/G**) (depending on model)
- forced air convection
- fan speed control from 10 to 100%
- heating and cooling systems to hold set temperature regardless of ambient conditions
- thermal insulation - polyurethane foam
- ILW 750 models equipped with wheels
- LCD graphic display in STD version **New!**  
LCD touch screen in TOP+ version
- illuminated touch buttons in STD version **New!**
- microprocessor temperature controller
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self-check function (auto control)

## Program possibilities

- STD version (see page 26)
- TOP+ version (see page 27-28)

## Standard equipment

- solid door
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- stainless steel wire shelves (2-6 pieces, depending on model) with slides set
- manufacturer's test certificate at +37 °C
- operation manual in English and English menu (other languages on request)
- over temperature protection according to DIN 12880: 2.0 class in STD version  
3.3 class in TOP+ version

## Options and accesories (icon description see page 51)

● for STD only

● for STD and TOP+

All POLEKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website: [www.pol-eko.eu](http://www.pol-eko.eu)

## Available options

- IL\*/A** - door with viewing window
- IL\*/C** - internal glass door
- IL\*/W** - reinforced version
- PW** - reinforced shelf
- IL\*/T** - extended temperature range to -10 °C
- FOT** - photoperiodic system

Parameter		Model	ILW 53	ILW 115	ILW 240	ILW 400	ILW 750

3 - additional internal glass door

4 - "fitted" - number of shelves fitted, included in price, "max" - number of shelves which can be fitted

## Application

- thermal resistance analysis of building materials, electronic and electrotechnical components etc.
- monitoring properties of products subjected to high temperatures
- drying of wires of papermaking machines
- drying of laboratory glass
- general aging and curing
- general heating
- ordnance material testing
- preheating
- vulcanization studies
- agricultural genetic
- conditioning
- digestion of proteins
- drying of plant tissues
- drug metabolism
- life and exposure studies
- paper drying
- serum protein analysis
- suspended solids evaluation

*Drying ovens can provide temperatures higher than ambient up to 300 °C.*

### Available options

**SL\*/A** - door with viewing window  
(temperature limited to +250°C)

**SL\*/W** - reinforced version

**PW** - reinforced shelf

\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - fluctuation measured in centre of the chamber

3 - "fitted" - number of shelves fitted, included in price, "max" - number of shelves which can be fitted

## Application

- drying of painted and lacquered components
- drying/sterilizing of components between clean and dirty zones
- drying of components on production line

Our main goal is to provide the customer with the highest satisfaction if it comes to flexibility of our offer and individual solutions. Pass-through drying ovens are based on standard models of drying ovens and are available in 2 versions: 112, 245 liters. Each request for such equipment is given professional advice and is discussed in details, therefore we kindly ask you to contact us on this matter.

Model		SLWP 115	SLWP 240

shelves fitted / max <sup>3</sup>		2/7	3/10
warranty		24 months	
manufacturer		POL-EKO-APARATURA	

\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - fluctuation measured in centre of the chamber

3 - "fitted" - number of shelves fitted, included in price, "max" - number of shelves which can be fitted

## Application

- drying of laboratory glass
- hot-air sterilization
- required by pharmacies, dentists and prosthetics

*Sterilizers have been equipped with a couple of additional functions that protect samples. They can sterilize at temperatures up to 250 °C.*

## Advantages

- available in STD version
- chamber capacity from 56 to 1005 litres
- stainless steel interior
- housing: powder coated sheet or stainless steel linen finish (**INOX/G**) (depending on model)
- forced or natural air convection
- fan speed regulation from 0 to 100% for SLW 53, 115 and 240 from 10 to 100% for SLW 400, 750 and 1000
- factory configured sterilizing programs
- automatic door locking system during operating time
- air-flap closed automatically after launching the program
- SRW 750 and SRW 1000 models equipped with wheels
- LCD graphic display **New!**
- illuminated touch buttons **New!**
- microprocessor temperature controller
- temperature sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self-check function (auto control)

## Program possibilities

- STD version (see page 26)

## Standard equipment

- solid door
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- stainless steel wire shelves (2-6 pieces, depending on model) with slides set
- air-flap diameter 37 mm for SR 53 and 115; 60 mm for SR 240, 400, 750 and 1000
- manufacturer's test certificate at +170 °C
- operation manual in English and English menu (other languages on request)
- over temperature protection according to DIN 12880: class 2.0

## Options and accessories (icon description see page 53)

All POL-EKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website: [www.pol-eko.eu](http://www.pol-eko.eu)

### Available options

**SR\*/A** - door with viewing window

**SR\*/W** - reinforced version

**PW** - reinforced shelf

warranty			24 months					
manufacturer			POL-EKO-APARATURA					

\* - dims of door handles, power cable and leveling feet or wheels not included

1 - working capacity of chamber can be smaller

2 - fluctuation measured in centre of the chamber

3 - "fitted" - number of shelves fitted, included in price, "max" - number of shelves which can be fitted

## Application

- plant and fungus growing
- microorganisms and insects breeding

Photoperiodic system is an additional option available for thermostatic cabinets (ST) and cooled incubators (IL). Some applications require day and night simulation. Photoperiodic system consists of illumination system placed in the door, on the side walls or in the ceiling of the unit (depending on model). For each segment of temperature-time profile the user sets either light ON or OFF. Standard light is daylight. Other colours on request.

## Advantages

- day and night simulation software able to control illumination and temperature
- temperature range for "night" simulation: -10 ... +70 °C for IL range and +3 ... +60 °C for ST range (depending on the selected temperature option)
- temperature range for "day" simulation: +5 ... +50 °C for IL range and +10 ... +50 °C for ST range
- selection of light colour, intensity and place of installation of the lamps (door, wall or shelves) - depending on model
- aluminum or stainless steel interior (depending on model)
- "photoperiodic system" option does not feature illumination intensity
- temperature program priority in STD version
- temperature or time program priority in TOP+ version

## Program possibilities

All POL-EKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website: [www.pol-eko.eu](http://www.pol-eko.eu)

## Photoperiodic system (\* /FOT option) for single and double chamber thermostatic cabinets (ST)\*\*

Option	ST/FOT2	ST/FOT4	ST/FOT6	ST/FOT8	ST/FOT10	ST/FOT15
available for models	ST 1+ ST 1/1+	ST 2+ ST 2/2+ ST 350/350	ST 2+; ST 3+ ST 2/2+ ST 3/3+ ST 350/350	ST 5+	ST 500 ST 700	ST 1200
temperature range with photoperiod ON [ °C]	+10 ... +50					
numbers of lamps on walls	2	4	6	8	10	15 (3 columns with 5 pieces)
adjustable illumination intensity	no	no	no	no	no	no

\*\* for ST models with \*/FOT option, inner dims can be narrower by 4 cm on each side., "FOT" and "FIT" options are factory preinstalled. There is no possibility to order them separately.

## Photoperiodic system (\* /FOT option) for cooled incubators (IL)\*\*

Option	IL/FOT2S	IL/FOT3S	IL/FOT5D	IL/FOT6D	ST/FOT8D	ST/FOT10D
available for models	ILW 53	ILW 115	ILW 53	ILW 115 ILW 240	ILW 240 ILW 400 ILW 750	ILW 750
temperature range with photoperiod ON [ °C]	+5 ... +50 °C					
numbers of lamps in door	-	-	5	6	8	10
numbers of lamps in ceiling	2	3	-	-	-	-
adjustable illumination intensity	no	no	no	no	no	no

\*\* "FOT" and "FIT" options are factory preinstalled. There is no possibility to order them separately.

*Phytotron system (\* /FIT option) features illumination intensity in the day/night simulation. Lighting elements are located in over-shelf panels, side walls or door (depending on the selected model). Option available for thermostatic cabinets (ST 500-1450 in the TOP+ version and INOX interior), cooled incubators (ILW 115-750) and climatic chambers.*

## Phytotron system (\* /FIT option) for thermostatic cabinets (ST in TOP+ version with INOX interior) and climatic chambers (KK)\*\*

Option***	ST/KK 350/FIT DS	ST/KK 500/700/FIT P	ST/KK 500/700/FIT S	ST/KK 1200/FIT P
temperature range with photoperiod ON [ °C]	+10 ... +50 °C	+10 ... +50 °C	+10 ... +50 °C	+10 ... +50 °C
numbers of shelves with over-shelf lighting std/max	-	1/3	1/3	1/3
lamps in door	yes	no	no	no
lamps in walls	yes	no	yes	no
adjustable illumination intensity	yes	yes	yes	yes

\*\*\* FIT DS - lamps in door and walls; FIT S - lamps in walls; FIT P - over-shelf panels

## Phytotron system (\* /FIT option) for cooled incubators (IL) and climatic chambers (KK)\*\*

Option	IL/KK 115/FIT P	IL/KK 240/FIT P	IL/KK 400/FIT P	IL/KK 750/FIT P
temperature range with photoperiod ON [ °C]	+10 ... +50 °C	+10 ... +50 °C	+10 ... +50 °C	+10 ... +50 °C
numbers of shelves with over-shelf lighting std/max	1/1	1/3	1/3	1/3
adjustable illumination intensity	yes	yes	yes	yes

\*\* "FOT" and "FIT" options are factory preinstalled. There is no possibility to order them separately.

### Application

- plant and fungus growing
- seeds germination
- microorganisms and insects breeding
- photostability tests
- food preservation experiments
- all research and tests that require stable temperature and humidity conditions (optionally light)
- tests of building materials

*Climatic chambers can control humidity and temperature to provide a precise environment.*

## Advantages

- available in STD and TOP+ versions
- chamber capacity from 112 to 1460 litres
- stainless steel interior
- housing: powder coated sheet, stainless steel linen finish (**INOX/G**) or polished (**INOX/S**) (depending on model)
- forced air convection
- fan speed control from 10 to 100%
- heating and cooling systems to hold the set temperature regardless of ambient conditions
- thermal insulation - polyurethane foam
- automatic defrosting function (see page 65)
- LCD graphic display in STD version **New!**  
LCD touch screen in TOP+ version
- illuminated touch buttons in STD version **New!**
- microprocessor temperature and humidity control (illumination intensity control optionally - \*/FIT option)
- temperature and humidity sensor fail alarm (see page 56)
- power failure control system (see page 56)
- real time clock
- sound alarm (see page 56)
- self check function (auto control)

## Program possibilities

- STD version (see page 26)
- TOP+ version (see page 27-28)

## Climatic chambers

- time, temperature and humidity control
- temperature range: -10 to +60 °C

## Climatic chambers with phytotron system (\* /FIT option)

- time, temperature, humidity and illumination intensity control
- illumination system: day and night simulation system with intensity control (every 10%):
  - placed in the door and in the side walls for KK 350 FIT DS
  - placed in the side walls for KK 700 FIT S
  - fixed as over-shelf panel with intensity control for KK 115, 240, 500, 400, 700, 750, 1200, 1450 FIT P
- temperature range - lighting off: -10 to +60 °C
- temperature range - lighting on: +10 to +50 °C
- light colour selection
- illumination power of up to 15 000 LUX per shelf (measured in geometrical center of the shelf placed 25 cm under illumination panel)
- program priority: temperature or time

**KK 350 STD interior**

Temperature and humidity sensors in the interior of a climatic chamber.

### Standard equipment

- double door (solid outside, glass inside)
- wheels with brakes (except KK 115 and 240)
- RS 232 interface and USB port **New!**; RS 232 or USB cable must be purchased additionally (RSK or USBK)
- stainless steel wire shelves (2-6 pieces, depending on the model) with slides set
- manufacturer's test certificate at 25 °C and 60% humidity
- operation manual in English and English menu (other languages on request)
- over temperature protection according to DIN 12880: class 3.3
- container for deionized water
- container for waste water

### Options and accessories (icon description see page 51)

● for STD only    ● for STD and TOP+

POL-EKO Measurement Laboratory provides Qualification procedures are required by pharmaceutical (also by veterinary pharmacy), cosmetic and biotechnology industries. A complete qualification procedure consists of the following parts: installation qualification (IQ), operational qualification (OQ), and performance qualification (PQ).

All POL-EKO-APARATURA products can be supplied with a calibration certificate issued by an accredited Measurement Laboratory. Further information is available on pages 87-89 and our website: [www.pol-eko.eu](http://www.pol-eko.eu).

Chambers of this kind can be also produced according to customer's requirements.

### Available options

**KK\*/A** - external glass door  
**FIT** - phytotron system

\* - basic version of thermostatic cabinets

## Interior

aluminum

Aluminum interior is standard feature of ST/CHL ranges (not in INOX version).

stainless steel

Stainless steel interior is standard feature of CL/IL/SL/SR/KK ranges; ST/CHL INOX versions and ZLN 85+, 125, 200 and 300 models.

## Housing

powder coated sheet (structural painting)

Powder coated (structural painting) housing is standard feature of ST/CHL/ZL/CL/IL/SL/SR/KK (not in INOX version). The standard housing is coated with a light grey colour (RAL 7035). The front panel is graphite (RAL 7016).

### INDICATIONS

The type of interior and housing has been stated in product codes of the equipment.

#### Interior

ALU - aluminum  
INOX - stainless steel

#### Housing:

PAINT - powder coated sheet  
INOX/S - stainless steel polished  
INOX/G - stainless steel linen finish

In a standard version (for ST/CHL – aluminum interior, powder coated housing; for CL/IL/SL/SR/KK – stainless steel interior, powder coated housing), the indication interior/housing in the product code has been omitted.

### EXAMPLES:

ST 1+ thermostatic cabinet, aluminum interior, powder coated housing: ST 1+  
ST 1+ thermostatic cabinet, stainless steel interior, polished stainless steel housing: ST 1+ INOX INOX/G  
CLW 53 STD incubator, powder coated housing: CLW 53 STD  
CLW 53 STD incubator, stainless steel linen finish housing: CLW 53 STD INOX/G  
(for CL/IL/SL/SR/KK the interior is always made of stainless steel)

stainless steel - INOX/G

Stainless steel linen finish (INOX/G) housing is standard feature of ST/CHL/ZL/CL/IL/SL/SR/KK INOX/G models.

stainless steel - INOX/S

Stainless steel polished (INOX/S) housing is standard feature of ST/CHL/ZL/KK INOX/S models.

# Parameter description

## Air-flap control

air-flap in STD version

The CL/SL/SR ranges feature an automatic air-flap control  
Diameter of the air-flap:  
- for 15, 32, 53, 115 models - 37 mm  
- for 240, 400, 750, 1000 models - 60 mm

## External display

LCD graphic display

The ST/CHL/ZL range feature an LCD graphic display with illuminated touch buttons.

5.7" LCD touch screen

The ST/CL/IL/SL/KK ranges in TOP+ version feature a 5,7" LCD touch screen.

LCD graphic display

The CL/IL/SL/SR/KK ranges in ECO and STD versions feature an LCD graphic display with illuminated touch buttons.

## Defrosting function

This is standard feature of ST/CHL ranges. Defrosting is performed automatically but is has to be chosen manually by the user at the most suitable time, e.g. when there are no samples in the chamber. It consists in temperature increase in the chamber.

## Over/under temperature (and humidity in KK) sound alarm

It is possible to set temperature (and humidity in KK) offset in the program menu. If the temperature or humidity (humidity in KK only) exceeds or falls beyond the set point, the alarm will go off and the "ALARM" message will appear on the display.

## Temperature (and humidity in KK) sensor fail alarm

If the sensors are not working correctly, an error message appears on the display.

## Sound alarm

This function sounds the alarm at a time specified by the user.

## Ethernet connection and remote control via internet

This is standard feature of ST/CL/IL/SL/KK ranges in TOP+ version.

The equipment can be controlled and monitored via internet. It is also possible to connect several units in-line and control them from one PC.

## 7 days programming

This is standard feature of ST/CL/IL/SL/KK ranges in TOP+ version.

It allows user to set program for each day of the week (e.g. Monday, 9.00-15.00, at 37 °C)

## Temperature or time program priority

For each program the user is able to choose either temperature or time priority. Temperature priority consists in: the unit achieves set temperature first and then starts time countdown.

Time priority consists in: the unit starts the process of achieving set temperature simultaneously with time being countdown.

## Over temperature protection system

All POL-EKO-APARATURA products (except ZL range) are equipped with over temperature protection 1.0 class according to DIN 12880.

Depending on the product range and version, various temperature protections are available. See details in the products parameters tables and on pages 52-53.

## Power failure control system

A temporary power failure while running the power is unnoticeable due to autoresume function but the time of power shortage is displayed on the screen.

## Administrator function

This is standard feature of ST/CL/IL/SL/KK ranges in TOP+ version. It allows to manage user accounts as support to GLP.

## RS 232 interface /USB port (does not concern the TOP+ version)

All POL-EKO-APARATURA products are equipped with RS 232 and USB ports. This feature enables PC connection, data archiving and transmission (e.g. temperature or humidity values). For this, it is necessary to purchase a connection cable (RSK or USBK) and EasyLab-T PLUS software. All the TOP+models are equipped with a USB port to save data on flash drives.

## Temperature (and humidity in KK) calibration in 3 points

This is standard feature of ST/CL/IL/SL/KK ranges in TOP+ version. Thanks to this feature the user has got a possibility to calibrate the chamber in 3 points of temperature and additionally in 3 points of humidity in KK range (only TOP+ version).

\* - model (e.g. ST 1+, IL 53, ZL 75)

\*\* - over temperature protection system (e.g. 3.1)

1 - for double chamber units, the option available for both chambers separately

2 - unavailable for 400, 500, 700, 750, 1200, 1000 and 350/350 models, ST/CHL 4+ and 5+

3 - only for ZL 75, 145, 180

4 - in case of SL range, maximum temperature is reduced to +250°C

option unavailable for CL/SL 15/32

5 - in case of CL/IL in TOP+ version, maximum temperature is reduced to +70°C

6 - basic version of thermostatic cabinets

7 - for KK 115, 240, 400, 750

8 - for KK 500, 700, 1200

9 - for ZLN 85+

10 - for CHL 500, 700, 1200 i 350/350

11 - thermostatic cabinets ST 500, 700, 1200

12 - except ZL 75, 145, 180

**s** - standard equipment

• - available option

## Internal glass door

This is standard feature of KK models.

This is an additional option available for ST/CHL/CL/IL ranges.

**Order number: \*/C.**

In case of CL/IL in TOP+ version, maximum temperature is reduced to +70°C.

## External glass door

This is an additional option available for ST/CHL ranges and for KK 500, 700, 1200, 1450 models.

**Order number: \*/A** (option factory preinstalled).

## Door with viewing window

This is an additional option available for CL/IL/SL/SR ranges, except CL/SL 15, 32 and for KK 115, 240, 400, 750 models.

**Order number: \*/A** (option factory preinstalled).

In case of SL range, maximum temperature is reduced to +250°C.

## Internal socket

This is an additional option available for ST/CHL/CL/IL ranges (not available for ECO version). In case of CL/IL in STD and TOP+ versions, maximum temperature is reduced to +70°C with internal socket.

**Order number: GNZ** (option factory preinstalled).

Internal socket allows to plug in additional equipment inside the chamber, e.g. laboratory shaker.

Max socket peak load 200W.

## Interior lighting

This is an additional option available for all product ranges.

**Order number: OWW** (option factory preinstalled).

Interior lighting features 1 light point. The user switches it on with enter button located in the front panel.

This option does not allow day/night simulation (see FIT and FOT options). If a unit is equipped with the open door sensor the light can switch on when the door opens. Max working temperature of the unit is reduced to +70°C, for SL/SR ranges to +250°C.

# Options and accessories

## Door lock

This is an additional option available for all product ranges .

**Order number: ZKL.**

Door lock allows to lock the door with a key.

## Wire shelf

This is standard equipment – wire shelf in ST/CHL ranges with slides set.

This is an additional option available for ST/CHL ranges.

**Order number: \*/P.**

Wire shelf is provided with slides set.

## Perforated shelf

This is standard equipment in ZLN 125,200,300 models.

This is an additional option available for ST/CHL/CL/IL/SL/SR/KK ranges.

**Order number: \*/PP.**

Perforated shelf is provided with slides set.

## Glass shelf

This is standard equipment in ZLN 75, 145, 180 models.

This is an additional option available for ZLN 75, 145, 180 models.

**Order number: \*/PS.**

## Stainless steel wire shelf

This is standard equipment in CL/IL/SL/SR/KK ranges, ZLN 85+ and in ST/CHL ranges with stainless steel interior. This is an additional option available for ST/CHL/CL/IL/SL/SR/KK ranges and ZLN 85+.

**Order number: \*/P INOX.**

INOX wire shelf is stainless steel wire shelf with slides set.

## Reinforced shelf

This is standard equipment for the CL/IL/SL 750 and 1000 models and all CL/IL/SL models in the reinforced version (order number: \*/W). This is an additional option available for CL/IL/SL/SR ranges, ST/CHL/KK 500, 700, 1200 models, ZLN 125, 200, 300 models.

**Order number: \*/PW.**

Reinforced shelf is provided with slides set. Reinforced shelf allows to store heavy loads on it. For maximum shelf workloads and maximum unit workloads look in the table with parameters for certain ranges of equipment (reinforced shelf - PW; reinforced version of the unit - W).

## Reinforced version

This is standard equipment for the CL/SL 1000 models. This is an additional option available for CL/IL/SL ranges (not available for ECO version) and ZLN 200, 300 models.

**Order number: \*/W** (option factory preinstalled).

Reinforced version of equipment allows to store heavy loads in the chamber. It consists of reinforced construction of the chamber and reinforced shelves. In this way we prevent damage to the unit caused by heavy loads. For maximum shelf workloads and maximum unit workloads look in the table with parameters for certain ranges of equipment (reinforced shelf - PW; reinforced version of the unit - W).

When a unit in reinforced version is purchased, the reinforced shelves are supplied instead of wire shelves.

## Stainless steel drawers

This is an additional option available for ST/CHL/CL/IL/SL/SR/KK ranges and ZLN 85+, 125, 200, 300 models.

**Order number: \*/SW.**

Stainless steel drawer is provided with slides set and can be ordered instead of wire shelf. Drawer is perforated and of 3 cm depth.

Different kinds of perforation and depths are available on request.

## Stainless steel cuvettes

This is an additional option available for any chamber.

**Order number: KUW.**

Stainless steel cuvettes can be placed on the shelves.

Different sizes available.

# Options and accessories

## Photoperiodic system

This is an additional option for the ST/IL ranges.

**Order number: \*/FOT** (option factory preinstalled).  
The illumination system can simulate day and night. Depending on the model, it is placed either in the door, or on side walls, or in the ceiling of the chamber. For the IL equipment, the temperature range when the illumination is switched off can be  $-10...+70^{\circ}\text{C}$  and  $+5...+50^{\circ}\text{C}$  when it is switched on. For the ST equipment, the temperature range when the illumination is switched off can be  $+3...+60^{\circ}\text{C}$  (depending on selected temperature option) and  $+10...+50^{\circ}\text{C}$  when it is switched on. Standard light colour: daylight, other colours available on request.

## Phytotron system

This is an additional option for the KK/IL ranges and the following ST models in the TOP+ version: 500, 700, 1200 and 1450.

**Order number: \*/FIT** (option factory preinstalled).  
The illumination system can simulate day and night and control illumination smoothly by every 10%. For the KK 350 model, the system is placed in the door and in the side walls (FIT DS option). For the KK 700 FIT S model, the system is placed in the side walls. For all the other equipment, the system comes as over-shelf panels with illumination (FIT P). For the KK models, the temperature range when the illumination is switched off is  $-10...+60^{\circ}\text{C}$  and  $+10...+50^{\circ}\text{C}$  when it is switched on. For the ST equipment, the temperature range when the illumination is switched off can be  $+3...+60^{\circ}\text{C}$  and  $+3...+50^{\circ}\text{C}$  when it is switched on. Illumination can be up to 15000 LUX per shelf (measured centrally 25 cm under the illumination panel). Standard light colour: daylight, other colours available on request.

## Access port for external sensor

This is an additional option available for all product ranges and standard equipment for the ZLN 85+, 125, 200 300 models.

**Order number: \* OCZ** (option factory preinstalled).  
There are different access port diameters available: 9, 10, 18, 20, 37, 40 mm; placed in upper part of the left chamber side. Other locations are available on request.

## Additional Pt 100 temperature sensor

This is an additional option available for CL/IL/SL/SR/KK ranges (not available for ECO version) and ST in top+ version.

**Order number: PT 100** (option factory preinstalled).  
This option consists of additional temperature sensor, internal socket, access port and value browse possibility in the display. The sensor may be supplied with a calibration certificate. It enables more detailed temperature monitoring during incubation. Additional Pt 100 sensor also allows to choose in the unit's menu which sensor should be used as primary and which as secondary. This way unit can work according to the sample temperature in which additional Pt 100 sensor is placed.

## Wheels

This is standard equipment provided for ST/CHL 1200; and CL/IL/SL/SR 750, 1000; IL 400; and KK models (except KK 115 and 240). This is an additional option available for all product ranges.

**Order number: QLK\***(option factory preinstalled).

For units of bigger capacities wheels are indispensable equipment. However some users may require wheels in smaller units. This is why we are able to equip each unit with the wheels.

## EasyLab-T PLUS software

This is an additional option available for all product ranges.

**Order number: EasyLab-T PLUS.**

All thermostatic products manufactured by POL-EKO-APARATURA are equipped with an RS232 interface and USB port and can be connected to a PC. The EasyLab-T PLUS software allows to record temperature and/or humidity values. The data (day, time, temperature/humidity values) can be transferred to a PC computer in a tabular form that can be used to generate charts. It can be further stored or exported to the .xls format. It is necessary to purchase an RS232 or USBK interface cable along with the software.

## Dot printer

This is an additional option available for all product ranges.

**Order number: EPSON.**

DOT printer enables current temperature, time and date printing. Printing interval is to be set in the unit's menu. There must be RSK (PC and printer connection cable) purchased along with DOT printer.

## “Kafka” thermal printer

This is an additional option available for all product ranges.

**Order number: KAFKA.** “Kafka” thermal printer enables current temperature, time and date printing.

Printing interval is to be set in the unit's menu.

There must be RSK (PC and printer connection cable) purchased along with “Kafka” printer.

## HEPA-fresh air filter

This is an additional option available for CL/SL/SR ranges (not available for ECO version).

**Order number: HEPA** (option factory preinstalled).

HEPA filter is installed at the air inlet to the chamber.

# Options and accessories

## Table with wheels

This is an additional option available for ST/CHL 1+, 2+, 3+ ; ZLN 75, 85+, SL/CL 15, 32; CL/IL/SL/SR 53, 115, 240 models.  
**Order number: \*/S** (powder painted) **or \*/S INOX** (stainless steel).  
Table with wheels provides you with the highest comfort of using our products. We offer a wide range of tables equipped with wheels. Different sizes of the tables are available on request. The user can choose the most suitable height.

## RS 232 cable

This is an additional option available for all product ranges.  
**Order number: RSK.**  
RS 232 cable is a connection cable for PC or printer. Standard cable length: 5m.

## RS 422 cable

This is an additional option available for all product ranges.  
**Order number: RSK/422.**  
RS 422 is a connection cable for PC. Standard cable length: 5m.

## RS 485 cable

This is an additional option available for all product ranges.  
**Order number: RSK/485.**  
RS 485 is a connection cable for PC. Standard cable length: 5m.

## USB cable

This is an additional option available for all product ranges.  
**Order number: USBK.**  
The cable is useful to connect the unit to a PC computer. Standard cable length: 5m.

## RS 422 interface / RS 485 interface

These are additional options available for all product ranges.  
**Order number: RS422 or RS485** (option factory preinstalled).  
This option consists of a converter from RS 232 (standard built in the device) to RS 422 or RS 485. It allows to plug a few pieces of equipment in-line.

## Container for waste water

This is standard equipment for KK range.  
This is an additional option available for KK range.  
**Order number: KK/K.**  
This is a plastic container for waste water. The container is recommended when it is not possible to connect the unit to a drain system.

## Container for deionized water

This is standard equipment for KK range.  
This is an additional option available for KK range.  
**Order number: KK/Z.**  
Plastic container for deionized water is standard equipment for all climatic chambers (KK), however also an additional container can be ordered. The container is recommended when it is not possible to connect the unit to a deionizer.

## Low water level sensor

This is an additional option available for the KK range.  
**Order number: KK/CP** (option factory preinstalled).  
An alarm goes off when the water level is low.

# Options and accessories

## Extended temperature range ST/50

This is an additional option available for ST range.  
**Order number: ST/50** (option factory preinstalled).  
It consists on extended temperature range up to +50 °C (standard temperature range in ST ranges is +3 °C...+40 °C).

## Extended temperature range ST/60

This is an additional option available for ST range.  
**Order number: ST/60** (option factory preinstalled).  
It consists on extended temperature range up to +60 °C (standard temperature range in ST ranges is +3 °C...+40 °C).

## Extended temperature range ST/70

This is an additional option available for ST range.  
**Order number: ST/70** (option factory preinstalled).  
It consists on extended temperature range up to +70 °C (standard temperature range in ST ranges is +3 °C...+40 °C).

## Over temperature protection 2.0 class according to DIN 12880

This is a standard function for the CL/IL/SL/SR equipment in the STD version, and optional for the ST range.  
**Order number: ST/2.0** (option factory preinstalled).  
It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the heaters. To resume operating, the user has to switch the unit off and turn it on again.

## Under temperature protection 3.2 class according to DIN 12880

This is an additional function for the ST/CHL ranges and the IL range in the STD version.  
**Order number: \*/3.2** (option factory preinstalled).  
It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the compressor. When the temperature goes above the set limit, the unit will resume operating automatically.

## Automatic defrosting function

This is standard feature of KK range.  
This is an additional option available for ST/CHL/IL ranges.  
**Order number: \* PLUS** (option factory preinstalled).  
Defrosting in this case is programmable (the user sets periodicity and duration). This function is carried out while the unit is working. This advanced technology holds the temperature stable, allowing only a minor increase in the chamber (considerably higher temperature rise is caused by opening the door).

## Low temperature version

This is an additional option available for CHL 500, 700, 1200 and CHL 350/350 models and IL range.  
**Order number: \*/T** (option factory preinstalled).  
It extends temperature range down to -10 °C (standard temperature range starts from 0 °C).

## Over temperature protection 3.1 class according to DIN 12880

This is a standard function for the CL/SL equipment in the TOP+ version, and optional for the ST/CL/IL/SL/SR ranges in the STD version.  
**Order number: \*/3.1** (option factory preinstalled).  
It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the heaters. When the temperature falls down below the set limit, the unit will resume operating automatically.

## Over/under temperature protection 3.3 class according to DIN 12880

This is a standard function for the KK, ST and IL ranges in the TOP+ version, and optional for the ST/IL in the STD version.  
**Order number: \*/3.3** (option factory preinstalled).  
It features a sample protection function: the user can set the over/under protection temperature and once it has been exceeded, the program will cut off the heaters or compressor. When the temperature goes back to the permitted range, the unit will resume operating automatically.

## Humidity measurement

This is an additional option available for CL/IL ranges (not available for ECO version).

**Order number: PHR** (option factory preinstalled). This option is not humidity control but humidity measurement. The user can browse humidity values in the unit's display.

## Open door alarm

This is an additional option available for all product ranges (not available for ECO version).

**Order number: SOD** (option factory preinstalled). The user sets the time (1 to 5 min) after which the alarm goes off and a message is displayed when the door is open.

## Door openings counter

This is an additional option available for all product ranges (not available for ECO version).

**Order number: LOD** (option factory preinstalled). This function counts door openings (how many times the door was opened during the program run).

## Calibration in 9 points in the chamber

This is an additional option available for all product ranges.

**Order number: BRT/9/L** (option factory preinstalled). This option consist of measurements performed in 9 points of the chamber (corners + geometric center) at temperature according to customer's specification; ACCREDITATED TEMPERATURE RANGE IS -20 °C...+200 °C.

## Calibration in 5 points on 1 shelf

This is an additional option available for all product ranges.

**Order number: BRT/1P/L** (option factory preinstalled). This option consists of measurements performed in 5 points on the unit's shelf (corners + geometric center) at temperature according to customer's specification; ACCREDITATED TEMPERATURE RANGE IS -20 °C...+200 °C.

## IQ, OQ, PQ qualification

This is an additional option available for all product ranges.

**Order number: IQ/OQ/PQ** (option factory preinstalled). It consists of: operation, qualification and performance qualification tests performed in our factory; empty installation qualification documentation; enclosed qualification book.

For more information see page 89.

## SMS info

This is an additional option available for all product ranges (not available for ECO version).

**Order number: SMS INFO** (option factory preinstalled). It consists of SMS notifications about set temperature (and humidity in KK range) values exceedings as well as about power shortages, on max 2 mobile phone numbers.

## Tests's results memory

This is standard feature of all models in TOP+ version. This is an additional option available for ST/CHL and CL/IL/SL/SR/KK ranges in STD version.

**Order number: PWP** (option factory preinstalled). This option is tests's results memory module that allows to safe data in the internal memory of the unit and brows it any time. To enable logging for units which are not equipped with internal memory, they need to be connected to a PC computer at all times. All data can be sent to a PC though the EasyLab-T PLUS software with an RSK or USBK cable.

## FIT panels independent control

This is an additional option available for ST 500-1200 models and KK range with FIT option (in case of phytotron system consisting of 2 over-shelf illumination panels).

**Order number: FIT/R2** (option factory preinstalled). This option consists of possibility to control each of 2 over-shelf illumination panel independently (e.g. one panel intensity can be set at 100%, the other one at 50%).

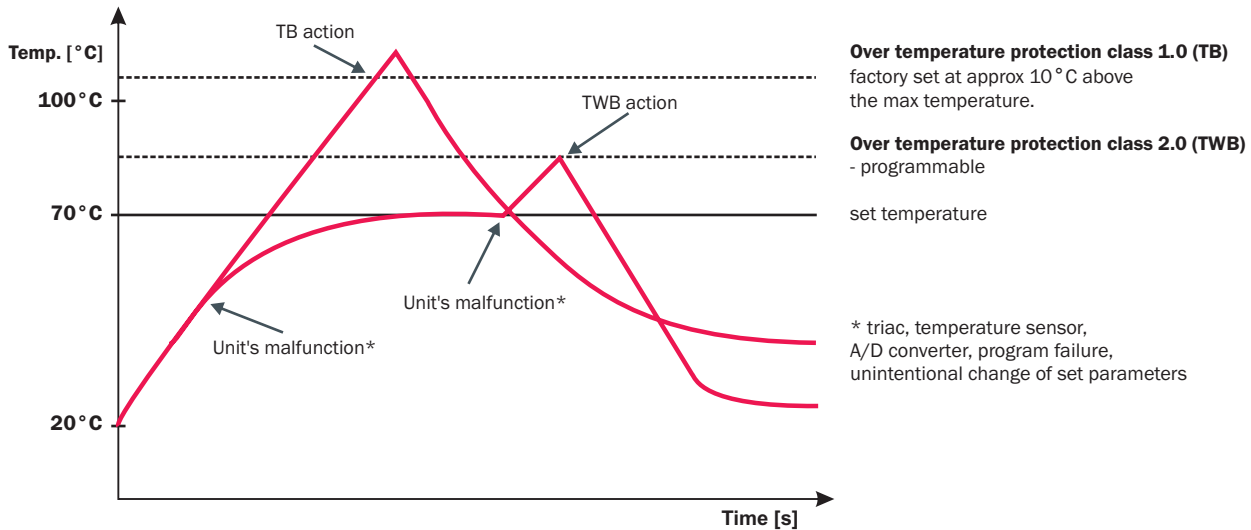

## Fan speed control

It is an option for the ST/CHL range which allows to control the fan speed from 10% up to 100%.

**Order number: ST/CHL WENT**  
It can be set for each program segment separately.

# Temperature protection

## Over temperature protection class 1.0 and class 2.0 according to DIN 12880

Over temperature protection class 1.0 to DIN 12880 is a standard function for the ST/CHL/CL/IL/SL/SR/KK equipment. It is factory set at approx. 10 °C above the max temperature.

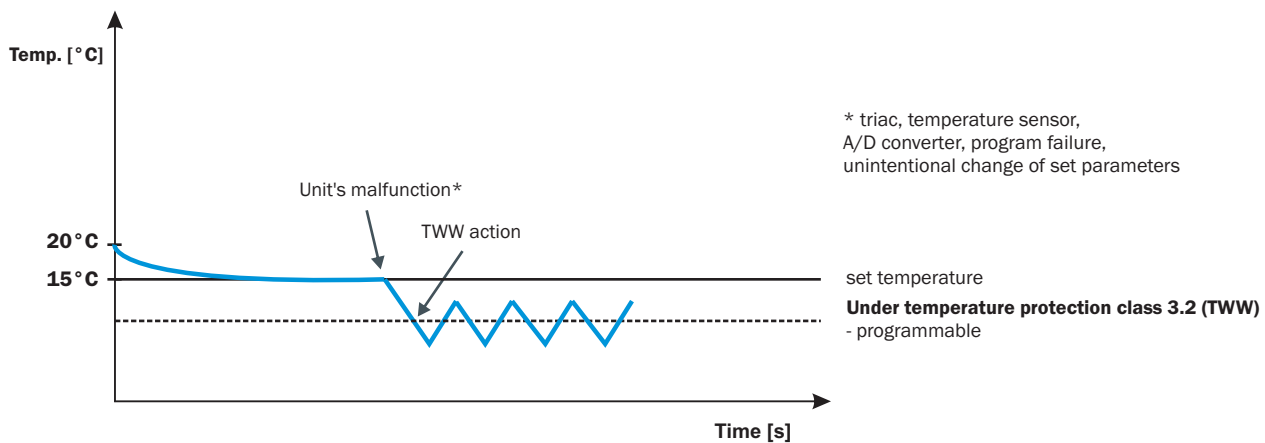

Over temperature protection class 2.0 to DIN 12880 is a standard function for the CL/IL/SL/SR equipment in the STD version, and optional for the ST range. **Order number: ST/2.0** (option factory preinstalled). It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the heaters. To resume operating, the user has to switch the unit off and turn it on again.

## Over temperature protection class 3.1 according to DIN 12880

Over temperature protection class 3.1 to DIN 12880 is a standard function for the CL/SL equipment in the TOP+ version, and optional for the ST/CL/IL/SL/SR ranges in the STD version. **Order number: \*/3.1** (option factory preinstalled). It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the heaters. When the temperature falls down below the set limit, the unit will resume operating automatically.

## Under temperature protection class 3.2 according to DIN 12880

Under temperature protection class 3.2 to DIN 12880 is an additional function for the ST/CHL ranges and the IL range in the STD version. **Order number: \*/3.2** (option factory preinstalled). It features a sample protection function: the user can set the protection temperature and once it has been exceeded, the program will cut off the compressor. When the temperature goes above the set limit, the unit will resume operating automatically.

## Over/under temperature protection class 3.3 according to DIN 12880

Over/under temperature protection class 3.3 to DIN 12880 is a standard function for the KK, ST and IL ranges in the TOP+ version, and optional for the ST/IL in the STD version. **Order number: \*/3.3** (option factory preinstalled). It features a sample protection function: the user can set the over/under protection temperature and once it has been exceeded, the program will cut off the heaters or compressor. When the temperature goes back to the permitted range, the unit will resume operating automatically.

**Steel laboratory furniture**

# Steel laboratory furniture

<b>Fume hoods</b>	<b>71</b>
<b>Steel laboratory furniture</b>	<b>73</b>
underbench cabinet for C-type frame of 750 mm height	74
underbench cabinets with castors; height 480 mm	74
underbench cabinet for C-type frame of 900 mm height	75
underbench cabinets with service supply for C-type frame of 900 mm height	76
underbench cabinets with castors; height 630 mm	76
octagonal underbench cabinet, for C-type frame of 900 mm height	77
wall mounted shelves with the door	77
wall mounted open shelves	77
C-type frame of 750 mm and 900 mm height	78
accessories: columns, shelves	79
innovative designing	80

## Advantages

- steel construction
- work safety conformity with PN EN 14175
- AUTO and MANUAL PROTECT functions for window closing – saving the air you breathe
- wide range of working chamber materials
- for use with non-flammable materials

**Auto-protect** function (option) features a motion sensor, window level sensor and electrical opening/closing system. If the sensor does not detect any motion in front of the fume hood, the system will close the window automatically. Control buttons are also a part of the system, as well as manual sliding window detector and light barrier that stops the motion of the window if an obstacle has been spotted.

Q-DYNAMIC 1200

### Q-Flow-Air Flow Sensor (standard equipment):

- controlling functions with alarm status indicated by visual and acoustic signals
- alarm indicating that the sash window exceeds the maximum opening height
- digital LED display showing current airflow in  $m^3/h$
- controlled and indicated alarm status
- power failure alarm
- power suspension system
- control of fume cupboard illumination

### Laboratory fittings covered with the chemically resistant polyamid 11 coating:

- average coating thickness 250-300 microns
- melting point 184-186 °C
- inflammability self-extinguishing
- shore hardness D up to 20 °C
- colour grey RAL 7035

### The sash window:

- metal
- in an aluminum frame
- in an MDF frame painted with chemically-resistant epoxy paint
- with the system of obstacle detection
- safety at every move

### Utilities:

- gas
- compressed air
- vacuum
- demineralised water
- nitrogen
- others at client`s request
- the possibility of revision so as to supply individual valves

Parameter		Model	Q-Dynamic 1200	Q-Dynamic 1500	Q-Dynamic 1800

standard airflow sensor of the Q-Flow type (or Schneider Elektronik of the FM 100 type)			yes, conformity with standards PN-EN 14 175-2,3		
airflow sensor with non-gradual airflow regulation, depending on the extent of sash window opening (Schneider Elektronik of the iCM type)			optional PN-EN 14 175-2,3		
optional motion detector with automatic closing device the window closes automatically when the fume cupboard is not in use (within defined time)			optional auto protect function		
optional motion detector with manual window closing upon time limit acoustic and visual signals indicate that the window should be closed			optional manual protect function		
electrical insulation class			klasa I		
permissible work board load [kPa]			2 kPa	4 kPa	5 kPa
warranty			24 months		

Steel laboratory furniture

The furniture that we offer is remarkable for its mechanical resistance. It has been constructed from highest quality materials. There is a wide selection of standard frames, cupboards, panels and worktops, but customized solutions are available too.

## Advantages

- steel construction featuring easy leveling, based on C-type frames
- 2 available versions: 750mm frame height – to assist sitting and 900mm to assist standing work
- large selection of panels, sinks and fittings made of various materials
- wide range of worktops (e.g. laminate, trespas, durcon)
- free configuration of frames to form segments
- work safety according to PN-EN 13150 norm
- professional advice, designing and visualization are a part of the offer

## Standard equipment

- made of galvanized steel, epoxy powder coated - chemical resistant, grey colour RAL7035
- underbench cabinets for C-type frames
- BLUM slides and hinges

## Indications

- SZ – underbench cabinet
- SZK – underbench cabinet with castors
- SZM – underbench cabinet with service supply
- SZO – octagonal underbench cabinet
- SZW – wall mounted shelves with the door
- SZWR – wall mounted open shelves
- S – frame
- 450-900 – cupboard width – frame height
- 2D – double wing door
- 1DP/1DL – single left/right door
- 1DP1S/1DL1S - single left/right door, one drawer
- 2D1S – double wing door, one drawer
- 2D2S – double wing door, two drawers
- 3S – three drawers
- 4S – four drawers

Columns with shelves

A mini column with AC power sockets

## innovative designing

**CATIA**

The furniture has been designed with a professional software that supports the whole engineering process. All single parts of the furniture are extremely precise and perfectly dimensioned.

**3 DVIA**

Projects prepared in the CATIA program can be further exported to the 3DVIA program to prepare screens and 3D animations.

**Project**

Every offer for furniture is complete with a customized 3DVIA visualization to overview a target configuration in a laboratory. Additional simulations, such as openings of drawers and doors, can be very helpful to guarantee an ideal, trouble free final configuration.

The program allows to prepare professional visualizations and fully dimensioned projections.

Other laboratory equipment

IV

## Other laboratory equipment

Colony counter	83
Laboratory shakers	84
Stationary samplers	86

## Advantages

- automatic weight compensation of Petri plates
- anti-shock counting technology
- ringlight technology enables even illumination of the counting field
- possibility of working with bright or dark background
- mean value calculation function
- standard marker included
- optional marker ZM 2002 for external counting
- Petri plates adapters (diameter < 120mm)
- removable Wolfhugel scale plate
- adjustable push force
- sound and visual counting control
- adjustable position of the magnifying glass
- affordable price

## Standard equipment

- colony counter
- magnifying glass
- standard marker
- bright and dark background
- Petri plates adapters
- Wolfhugel scale plate

## Accessories

- marker ZM 2002 for external counting

*Colony counter is invaluable help in every microbiological laboratory since the most time consuming activity is counting the colonies on Petri plates. An easy-to-use device featuring quick and precise counting.*

		Model
		<b>LKB 2002</b> 
<b>Parameter</b>		
counting field diameter [mm]		120
display		LED (0...999)
magnifying glass		2,5 X
illumination		20W ringlight
dims [mm]	width x depth x height	300 x 325 x 90
weight [kg]		4,9
nominal power [W]		22
voltage 50/60 Hz [V]		220-240
warranty		24 months
manufacturer		POL-EKO-APARATURA

## Advantages

- orbital movement
- microprocessor control of rotation and time
- orbital diameter: 10...25 mm
- max shaking weight: 10 kg
- variable speed control: 30...300 rpm
- shaking mode: from 1 min to 99 h, or continuous
- LCD digital display
- anti-skid mat (option)
- various shaking tables
- can be located inside cooled incubators

## Accessories

- universal shaking table
- separating funnel attachment
- fixing clip support
- dish attachment
- test tube support
- Erlenmeyer flasks (25...2000 ml) attachment

LS 280

ILW 53 with LS 280

Laboratory shakers have been designed to fit inside cooled incubators (IL range)

Model		LS 280	LS 350	LS 500	LS 700
Parameter					
movement		orbital			
controller		microprocessor			
display		LCD display			
speed range [rpm]		30 ... 300			
accuracy [rpm]		10			
amplitude [mm] <sup>1</sup>		5	5 or 10		
max load capacity [kg]		10			
shaking mode		1 min...99 h or continuous			
dimensions without / with shaking table [mm]	width	320	390	550	700
	height	120 / 220	120 / 220	120 / 220	120 / 220
	depth	330	400	440	420
fits to cooled incubator		ILW 53	ILW 115	ILW 240	ILW 400
nominal power [W]		60	60	60	60
weight with shaking table [kg]		10	15	22	25
ambient temperature [°C]		+10...+40			
humidity [%]		up to 70			
voltage 50 Hz [V]		220...240			
warranty		24 months			
manufacturer		POL-EKO-APARATURA			

1 - requested amplitude must be specified in the order

universal platform

## Universal platform

Universal platform for various kinds of vessels, with 4 roller clamps (without anti-skid mat).

platform for fixing flask handles

## Platform for fixing flask handles

Platform for fixing flask handles, suitable for flasks of the following capacities: 25 ml, 50 ml, 100 ml, 250 ml, 500 ml, the handles shall be ordered separately.

platform for Petri plates shaking

## Platform for Petri plates shaking

Platform for shaking Petri plates, bacteria culture flasks and other vessels of low centre of gravity.

platform for separatory funnels

## Platform for separatory funnels

Platform for separatory funnels with 3 roller clamps for shaking, salting, extraction and concentration.

anti-skid mat

## Anti-skid mat

Anti-skid mat for LS laboratory shakers.

## Advantages

- representative sample taking according to PN-ISO 5667
- sampling system:
  - vacuum
  - peristaltic pump
- sampling mode:
  - time proportional
  - flow proportional
  - event (e.g.: pH value exceeding)
  - combined
- intuitive menu
- up to 5 configurable sampling programs
- bottle filling overview
- suitable for continuous outdoor use
- can be implemented into a monitoring system
- refrigerated chamber
- SD card recording system: pH, conductivity, redox, dissolved oxygen, flow, chamber temperature etc.

Representative sample taking according to PN-ISO 5667 directive.

Parameter		Model	PP 2002+	PP 2002E	PP 2002M
					
sampling system			vacuum system	peristaltic pump	peristaltic pump /vacuum system
sample storing			stable temperature +4 °C regardless of ambient conditions		
menu language			English, French, Polish, Czech, Romanian, Lithuanian, Italian		
medium			liquid media of min conductivity 20 µS/cm and max temp. 60 °C		
hose blowing			before and after sample taking		
sampling mode			automatic time proportional, flow proportional, event or manual		
sampling height [m]			max. 8 / up to 30 (option)		
sample volume [ml]			regulated 30...250/500	regulated 10...9990	regulated 30...250/500 or 10...9990
hose length [m]			8 standard		
hose diameter [mm]			12		
distributor			round		
number of bottles x capacity [l]			24 x 1; 12 x 2,9; 4 x 10; 1 x 25		
overall dims [mm]		width	630		630
		height	1070		1325
		depth	660		660
weight [kg]			90		100
housing			acid-proof stainless steel with 40 mm insulation		
ambient temperature [ °C]			-20...+45		
nominal power [W]			350		450
controller			microprocessor, graphic display bottle filling overview		
programming			5 programs, 8 tasks each		
data logging			SD card (option)		SD card
input signals			8 analogue, 4 binary		
output signals			4 binary		
communication			RS 232 or RS 485 / PROFIBUS, GSM modem (option)		
installation site			indoor or outdoor		
voltage 50/60 Hz [V]			230		
warranty			24 months		
manufacturer			POLEKO-APARATURA		

**POL-EKO Laboratorium  
Pomiarowe company**

AP 115

**POL-EKO Measurement Laboratory is Accredited by the Polish Centre for Accreditation (a member of ILAC) and provides accredited services**

- calibration of chambers for **steam sterilization (such as autoclaves, Koch steam sterilizers etc.)**
  - method temperature range: **+60...+130 °C**
  - measurement capability: 0,5 °C
  - place of calibration: customer's site
  
- calibration of **lab furnaces**
  - method temperature range: **+100...+1000 °C**
  - calibration and measurement capability: 3,0 °C
  - place of calibration: Measurement Laboratory or at customer's site
  
- calibration of **thermostatic and climatic chambers** (ovens, incubators, sterilizers, cooled incubators, thermostatic cabinets, refrigerators, freezers, climatic chambers etc.)
  - method temperature range: **-20...+200 °C**
  - calibration and measurement capability 0,15 °C
  - place of calibration: Measurement Laboratory or at customer's site
  
- calibration of **water baths and thermoreactors**
  - method temperature range: **-20...+200 °C**
  - calibration and measurement capability: 0,15 °C
  - place of calibration: Measurement Laboratory or at customer's site

The **calibration certificate** features:

- average value in each point
- uncertainty of the measurement
- temperature homogeneity in chamber or on the surface
- load effect (optionally)

- calibration of **electric and electronic thermometers in Measurement Laboratory**
  - method temperature range: **-20...+1000 °C**
  - calibration and measurement: 0,05 °C in range -20 ... +80 °C; 0,06 in range +80 ... +200 °C; 2,5 in range +200 ... +1000 °C
  
- calibration of **electric and electronic thermometers at customer's site**
  - method temperature range: **+30...+200 °C**
  - calibration and measurement capability: 0,2 °C
  
- calibration of **data loggers for air temperature measurement**
  - method temperature range: **0...+130 °C**
  - calibration and measurement capability: 0,2 °C in range 0 ... +60 °C; 0,3 °C in range +60 ... +130 °C
  - place of calibration: Measurement Laboratory
  
- calibration of **thermo hygrometers**
  - method temperature range: **+10...+60 °C**
  - relative humidity range: **30...90%**
  - place of calibration: Measurement Laboratory

AP 115

The **calibration certificate** features:

- average value of temperature (humidity)
- temperature (humidity) correction
- measurement uncertainty

## Services beyond accreditation

- calibration of **climatic chambers**
  - relative humidity range: **30...90%**
  - place of calibration: Measurement Laboratory or customer's site
  
- **IQ, OQ, PQ qualification procedures**
  - place of calibration: Measurement Laboratory or customer's site
  
- **mapping of room temperatures**

*Qualification procedures are required by pharmaceutical (also by veterinary pharmacy), cosmetic and biotechnology industries. A complete qualification procedure consists of the following parts: installation qualification (IQ), operational qualification (OQ), and performance qualification (PQ). The qualification procedure after conducting measurements and completing documentation is followed by issuing the "Qualification book" (full list of conducted measurements and tests is available upon request).*

## POL-EKO-APARATURA also provides many services concerning various laboratory equipment

- pH-meters
- conductivity meters
- multiparameter metres
- photometers and spectrophotometers
- EcaFlow 150 GLP analyser of trace concentrations of metals
- monometric BOD equipment, e.g. OxiTop, OxiDirect etc.
- checking and cleaning of: pH and redox electrodes; oxygen sensors; conductivity cells
- implementing new photometric methods into photometers and spectrophotometers

The Measurement Laboratory issues a "**Verification Certificate**" after the control.

# POL-EKO-APARATURA

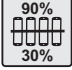

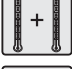

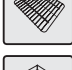

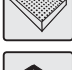

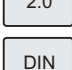

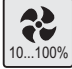

manufacturer of laboratory equipment  
for laboratory analysis and technological processes,  
authorised distributor in Poland of:  
ARCTIKO, AQUALYTIC, EUTECH, HAMILTON,  
ISTRAN, KNICK, NICKEL-ELECTRO,  
RODWELL, THERMO SCIENTIFIC, WTW

# Options and accessories

	Internal glass door <b>Order number: */C</b>		Phytotron system <b>Order number: */FIT</b>
	External glass door <b>Order number: */A</b>		FIT panels independent control <b>Order number: FIT/R2</b>
	Door with viewing window <b>Order number: */A</b>		Open door alarm <b>Order number: SOD</b>
	Wire shelf <b>Order number: */P</b>		Door openings counter <b>Order number: LOD</b>
	Stainless steel wire shelf <b>Order number: */P INOX</b>		Additional temperature sensor <b>Order number: PT 100</b>
	Perforated shelf <b>Order number: */PP</b>		Internal socket <b>Order number: GNZ</b>
	Glass shelf <b>Order number: */PS</b>		HEPA-fresh air filter <b>Order number: HEPA</b>
	Reinforced shelf <b>Order number: */PW</b>		Humidity measurement <b>Order number: PHR</b>
	Stainless steel drawers <b>Order number: */SW</b>		Door lock <b>Order number: ZKL</b>
	Stainless steel cuvettes <b>Order number: KUW GN */*</b>		SMS Info <b>Order number: SMS INFO</b>
	Wheels <b>Order number: QLK*</b>		Test's results memory <b>Order number: PWP</b>
	Table with wheels <b>Order number: */S or */S INOX</b>		Container for deionized water <b>Order number: KK/Z</b>
	Over temperature protection 2.0 class according to DIN 12880 <b>Order number: ST/2.0</b>		Container for waste water <b>Order number: KK/K</b>
	Over temperature protection 3.1 class according to DIN 12880 <b>Order number: */3.1</b>		Low water level sensor <b>Order number: KK/CP</b>
	Under temperature protection 3.2 class according to DIN 12880 <b>Order number: */3.2</b>		RS 422 interface (instead of RS 232) <b>Order number: RS422</b>
	Over/under temperature protection 3.3 class according to DIN 12880 <b>Order number: */3.3</b>		RS 485 interface (instead of RS 232) <b>Order number: RS485</b>
	Automatic defrosting function <b>Order number: * PLUS</b>		RS 232 cable <b>Order number: RSK</b>
	Low temperature version <b>Order number: */T</b>		RS 422 cable <b>Order number: RSK/422</b>
	Extended temperature range to +50 °C <b>Order number: ST/50</b>		RS 485 cable <b>Order number: RSK/485</b>
	Extended temperature range to +60 °C <b>Order number: ST/60</b>		USB cable <b>Order number: USBK</b>
	Extended temperature range to +70 °C <b>Order number: ST/70</b>		Dot printer <b>Order number: EPSON</b>
	Reinforced version <b>Order number: */W</b>		„Kafka“ thermal printer <b>Order number: KAFKA</b>
	Access port for external sensor <b>Order number: *OCZ</b>		EasyLab-T PLUS software <b>Order number: EasyLab-T PLUS</b>
	Interior lighting <b>Order number: OWW</b>		Calibration in 5 points on 1 shelf <b>Order number: BRT/1P/L</b>
	Fan speed control <b>Order number: ST/CHL WENT</b>		Calibration in 9 points in the chamber <b>Order number: BRT/9/L</b>
	Photoperiodic system <b>Order number: */FOT</b>		IQ, OQ, PQ qualification <b>Order number: IQ/OQ/PQ</b>
